

# DPVPA Report to DPAC

---

**January 6, 2014**

Our executive has decided to change what we share with DPAC in order to better provide information about our profession and professional association.

As such, instead of sharing about specific events and programs in schools, we will be sharing aspects of our association, as well as supports and learning opportunities for principals and vice principals at a national, provincial, and district level.

The goal is to help parents understand how our members and association work to ensure quality education for each child in our district and for educational excellence at all levels.

Below is the tentative schedule of topics that will be shared for the duration of the school year.

January	Overview of topics
February	British Columbia Principals and Vice Principals Association Code of Ethics
March	Leadership Standards for Principals and Vice-Principals in BC
April	Professional Learning Opportunities for Principals and Vice Principals in SD 57
May	Mentorship and Capacity Building for Principals and Vice Principals in SD 57
June	Professional Learning Communities
September	School Plans for Student Success

We are hopeful that this new format will be beneficial for parents - our valued partners.

Happy New Year!
