

Policy & Governance

February 8, 2021

Submitted by Gillian Burnett

I attended Policy and Governance on behalf of DPAC on February 8, 2021. We began with introductions as it was quite a large group. During introductions, people were asked to share whether or not they had participated in the development of the new draft Administrative Procedures and what that looked like. Those that had reviewed and participated in drafting the new ones all seemed to do so only when it pertained to their scope of work. For example, accounting reviewed those related to accounting practices, Student Support Services reviewed those related to special education, etc. Chair, Trustee Bekkering then asked the group how they wanted to proceed as there were many AP's to cover. Acting Superintendent Heitman thought it best to start with brand new AP's, but when we started to look into one, it came to light that the binders provided to Stakeholders were missing every second page. That made it difficult for us to properly advise. It was decided that each group should submit a list of AP's they would like to review and agenda's will be developed accordingly. The meeting was adjourned. Diane took down the names of all members that had incomplete binders so that the complete information could be provided before the next meeting March 8th.
